

Welcome to the
**2026 CSCB
National Conference**

September 27–29, 2025

Gatineau, QC

Focus on Compliance

Canadian Food
Inspection Agency

Agence canadienne
d'inspection des aliments

Canadian Food Inspection Agency (CFIA) Single Window (SW) Reprocessing

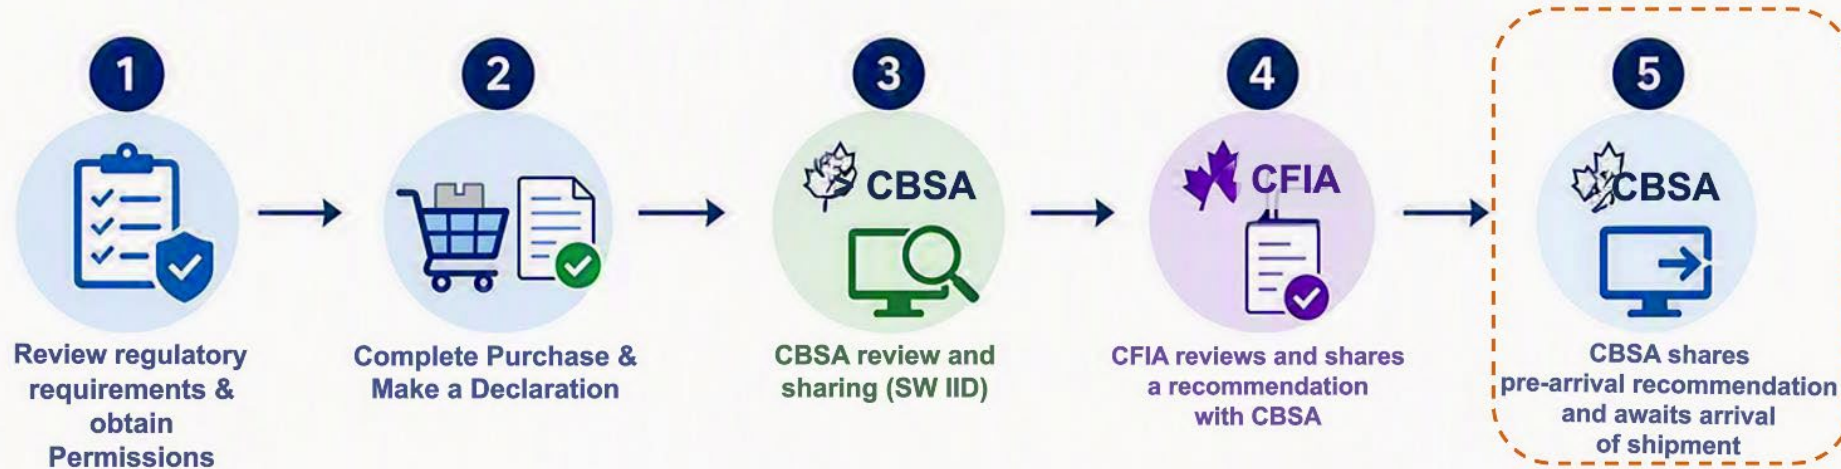

Canada 

How does the CFIA SW Reprocessing work?

- When there is a change —such as an updated AIRS requirement or change to the status of a required document — CFIA triggers the reprocessing of implicated shipments.
- As a result, brokers and importers may receive an updated response to their electronic declaration submission.
 - Note: that SW reprocessing is only applied to electronic declarations that have not yet received a final release decision from CBSA.

WHEN DOES SW REPROCESSING APPLY?

 **CBSA**
Canada Border
Services Agency

 **CFIA**
Canadian Food
Inspection Agency

 **SW IID**
Single Window
Integrated Import
Declaration

SW Reprocessing
The reprocessing of a declaration may occur between the pre-arrival recommendation (Step 5) and the final CBSA decision (step 8)

What triggers reprocessing

AIRS action That Do Not Trigger Reprocessing

- New HS code/product added to AIRS
- HS code/product removed from AIRS
- New end use is added to AIRS
- New miscellaneous code added is to AIRS
- Addition, modification or removal of an import condition
- Addition, modification or removal of a reference or a web link
- Removal of an AIRS Registration Type from a CFIA requirement
- Removal of a required document (LPCO) materialized and dematerialized from a CFIA requirement
- Change in AIRS release recommendation from:
 - *Refused Entry to any release recommendation*
 - *Change any release recommendation (Refused Entry, Refer to CFIA NISC, Refer to Veterinary Inspection, CBSA Inspection, etc.) to Approved*

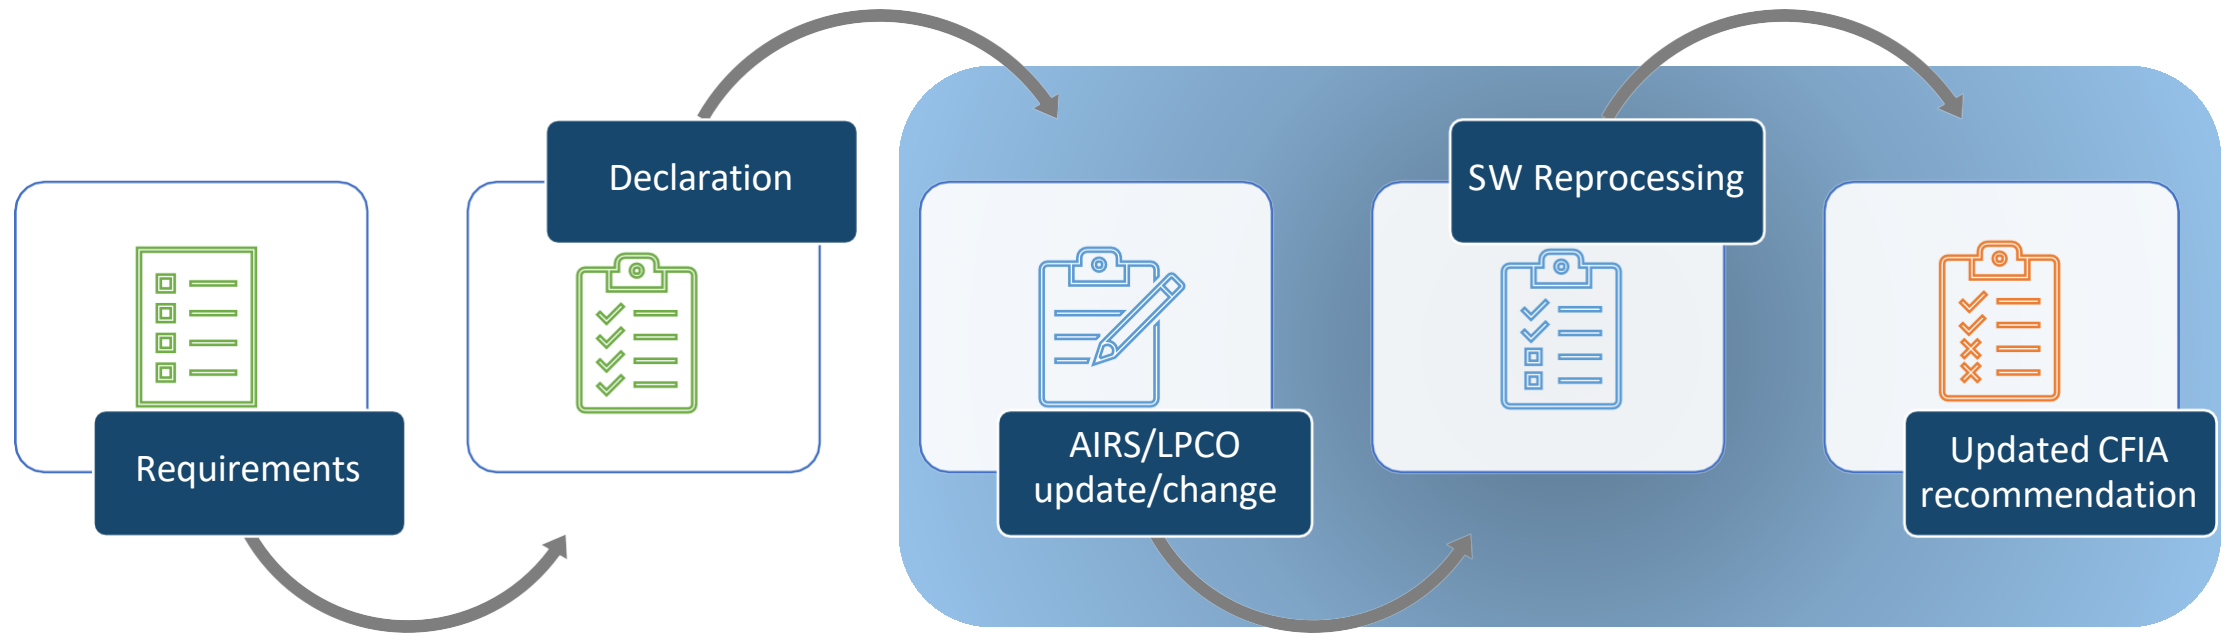

AIRS action That Trigger Reprocessing
